Kurukuru Plaza

(Suita City Resource Recycling Center)

Let's start and enjoy living a recycling & eco-friendly life.

ぐるぐる生活はじめよう

3Rs

REDUCE - Waste Prevention

Make conscious choices to minimize waste, such as reducing excessive packaging, cutting down on disposable trays, and bringing your own shopping bags.

REUSE - Using Items Again

Extend the life of everyday items by reusing containers and products, such as refillable shampoo bottles and detergents.

RECYCLE - Resource Recovery

Transform used materials into new products, such as turning aluminum cans into car wheel rims and hot plates, or recycling paper cartons into cups and toilet paper.

"Mixed Waste is Trash, Sorted Waste is a Resource!"

A small change in mindset can make a big impact on the environment. Let's work together to create a sustainable future!

BOTTOM

The Senri Recycling Plaza Citizen Research Institute

I will start with what I can do for environmental issues.

Activities

At the Senri Recycling Plaza Citizen Research Institute, volunteer citizen researchers work in teams under the guidance of university professors and other experts. They conduct research, investigations, and practical activities from a citizen's perspective to promote awareness of the 3Rs (Reduce, Reuse, Recycle) and environmental issues.

The Citizen Research Institute offers environmental outreach programs at community centers, schools, and other venues, led by our volunteer citizen researchers. These programs cover a variety of topics, including handmade eco-toys, furoshiki wrapping techniques, papermaking, and the essence of the SDGs.

Collaborative project with citizens and businesses

Environmental Awareness Seminar

Towards a Richer, Low-Carbon Lifestyle

A. Kurukuru Shopping Area 5th Floor (Building C)

a. Give & Take Corner

This is a free exchange space where you can donate clothing and tableware you no longer need from home and take what you find useful. Help reduce waste and give items a second life!

b. Kurukuru Goods Display & Sale

We showcase and sell recycled products crafted in our workshops. Discover unique, eco-friendly items!

c. Rack de Flea Market

A permanent flea market where you can purchase second-hand goods at affordable prices.

B. Reusable Tableware

We offer rental services for reusable tableware to help reduce waste at festivals and events. Choose reusable options and make your event more sustainable!

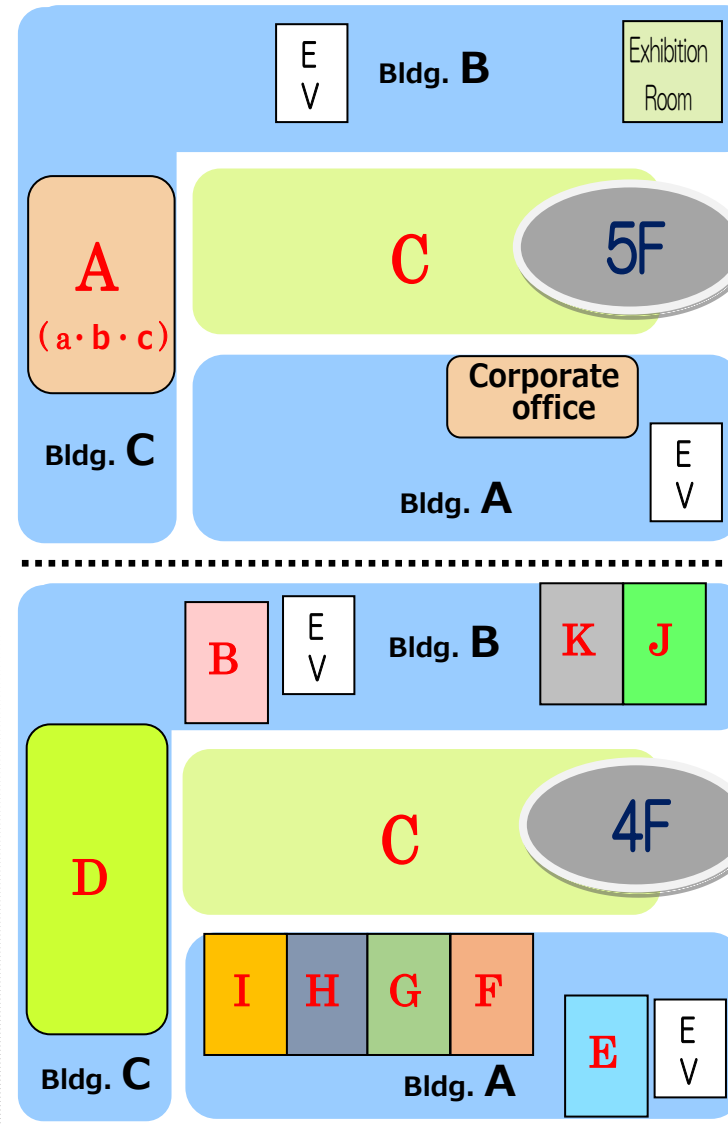

C. Event Plaza & 4th Floor Hall (Building B)

We host seasonal and theme-oriented events, including workshops, recycled furniture sales, and a lottery sale for refurbished bicycles. Join us for fun and eco-friendly activities!

D. Multi-Purpose Hall (Rental Space)

A spacious, versatile hall suitable for large gatherings. Available for rent.

Kurukuru Plaza Floor Map

F. Information Studio

A dedicated space for creating and sharing environmental content online. Equipped for video and image recording, editing, and production, this studio helps promote sustainability through digital media.

K. Woodworking Workshop (Workshop 6)

We provide guidance on repairing wooden furniture and repurpose unwanted wooden items for reuse. Visitors can also use the available tools to create their own woodworking projects.

A Place to Pass Down the Spirit and Skills of
Caring for Our Belongings

Citizen Workshops – Upcycle Unwanted Items!

E. Fabric Workshop (Workshop 1)

Transform unused kimono, clothing, or umbrella fabric into blouses, accessories, and more. Give old textiles a new life with creative remakes!

G. Green Workshop (Workshop 2)

– Also Available as a Rental Space

Engage in papermaking using recycled paper cartons while learning about forest conservation and sustainable living. The space is also available for rental.

H. Citizen Research Institute (Workshop 3) – "Tsunagari Lab"

Our volunteer citizen researchers study, investigate, and engage in hands-on environmental activities to address ecological issues.

I. Bicycle Workshop (Workshop 4)

Bicycles produce zero CO₂ emissions, making them a great eco-friendly mode of transportation! We provide repair and maintenance advice and repurpose parts from discarded bicycles to assemble refurbished bikes.

J. Multi-Purpose Space (Workshop 5)

A versatile space for hands-on experiences, community interactions, and collaborative projects with businesses through our Eco-Lab Partners initiative. Ideal for events and workshops.
